October 20, 1958

Mr. Joel Drucker
75 West 190 Street
New York 68, New York

Dear Mr. Drucker:

Thank you for your letter of October 6th, which has been forwarded to my present address.

I am enclosing one article in response to your request but I trust you will realise that the literature on bacteriophage is immense and cannot easily be handled in this way. The best technical treatment will be found in the book by S.E. Luria, "General Virology" which was published by Wiley in 1953. If you would like more help may I suggest that you get in touch with a former student of mine, Dr. Norton Zinder, at the Rockefeller Institute for Medical Research in New York.

Best wishes,

Yours sincerely,

Joshua Lederberg
Professor of Medical Genetics
